FLUSH MOUNT TERMINAL BATTERIES

NEW DRAG SPECIALTIES FLUSH MOUNT TERMINAL DESIGN CONCEPT

The flush mount terminal design concept enables front mount cable harness connections without the need for a spacer. Additionally, both the top mount or flush mount connections can be used for either a primary cable harness or for an auxiliary application. E.g. charger harness, accessories, etc.

- The flush mount terminal also utilizes a direct path connection to the internal element post resulting in a more durable design with lower electrical resistance and increased performance.
- No spacers or washers required. No concern of high resistance from loose spacers. Harnesses connect directly to the lead terminal and remain securely fastened.
- Rectangular nuts facilitate SIDE & TOP harness connections for both primary and auxiliary applications. Batteries are supplied with 4-6 x 13 mm bolts.

DESCRIPTION	PART #
BATTERY DRAG YTX20H-FT	2113-0714
BATTERY DRAG YTX20HL-FT	2113-0715
BATTERY DRAG Y1X30L-FT	2113-0716

All part numbers in **BOLD BLUE** are new for this year
