SF SERIES BLUETOOTH® COMMUNICATION SYSTEM

SF2 AND SF4 UPGRADE

Each SF2 and SF4 comes now with one standard and one HD speaker set. The HD speaker will take your ride to the next level with louder, clearer quality audio. The standard speaker are a bit smaller in size and may be a more comfortable choice for some riders. The SF2 and SF4 are available in a standard package with 1 headset and a dual package with 2 headsets.

SF2 and SF4

- Rider to Passenger or Small Group Communication
- For riders looking to communicate with their passenger, the SF2 provides simple Rider to Passenger 2-way intercom communication up to 800 m (880 yards) in open terrain
- For those who ride in small groups, the SF4 is equipped with 4-way intercom over 1.2 kilometers (0.8 miles)
- Both models let riders enjoy smartphone connectivity
- Riders can listen to music and use the intercom simultaneously using the Audio Overlay™ feature

Please note that Audio Overlay works best with Android devices, while iOS offers limited functionality.
