ALLOY TRIPLE CLAMP

- CNC-machined from aerospace quality 7075 T-6 aluminum alloy
- Handlebar clamps included
- Adjustable bar clamp mounting position
- Easy to install; pre-pressed Pivot Works lower bearing included
- Developed in collaboration with top US MX/SX and MXGP teams
- Torque settings etched on the clamps
- Greater rigidity
- Anodized finish

SFS COMPLETE TRIPLE CLAMP

- CNC machined from aerospace quality Tridium alloy
- Handlebar clamp included
- Easy to install; pre-pressed Pivot Works lower bearing included
- The industry's first air-adjustable, oil-damped suspended handlebar clamp, offering 10 mm of travel
- Improve the riding comfort and decrease arm pump
- Developed in collaboration with top US MX/SX and MXGP teams
- No service required
- Torque settings etched on clamps
- Patented in Europe and USA

NOTE: High-pressure air pump required to adjust the clamps.

SFS SPRING TOP CLAMP

- Improve the riding comfort, decrease the arm pump
- Exceptional capacity to absorb small bumps and important impacts
- Works in the same directions as the front fork, no floating feeling
- Suitable for every rider in motocross, supercross and enduro
- CNC-machined from aerospace quality 7075 T-6 aluminium alloy
- Offers greater rigidity than stock
- Torque settings indicated on clamps; lower bearing included
- Easy to install; pre-pressed Pivot Works lower bearing
- No service required
- Anodized finish

SFS SPRING TOP CLAMP

- Simplified design
- Same great features and benefits of the original SFS upper triple clamp but utilizes springs in place of the air chambers found on the original SFS
- Improves riding comfort and decreases arm pump
- Works in the same direction as the front fork
- CNC-machined from aerospace quality 7075-T6 aluminum alloy
- Handlebar clamp included for 1-1/8" handlebar
- 10 mm of travel; 22 mm offset
- Torque settings etched on clamps
- No service required
- Anodized finish

NOTE: Requires air pump.
