## BELT DRIVE SYSTEM FOR M8 AND CLUTCH BASKET FOR TWIN CAM & M8

1120-0430

### CHAIN-DRIVE CLUTCH BASKET

- Stronger than OEM
- Hard-anodized finish
- Primary chain sprocket and 106T starter ring gear included
- Dual retaining ring design allows the use of 07-17 Twin Cam or 17-21 M-Eight OEM style clutch hub bearing (sold separately)
- Made in the U.S.A.

DESCRIPTION	PART #
FOR 07-21 BIG TWIN	
Chain-Drive DR106T 07-21	<b>1120-0430</b>

1120-0434

### BELT DRIVE

- Features a two-piece motor plate design and 2" (51,8 mm) primary belt
- 52/69 pulley combination for a 1.32:1 final drive ratio
- Belt profiles are unique to each kit, requiring matched pulleys for each belt; pulleys may not be interchanged
- Front pulley cover is counterbored for a super-clean appearance
- Diaphragm clutch is a 6-bolt configuration for a more firm feel and improved appearance
- Kit includes side and top guard for an aggressive, open dome look
- Springs and spring collar are enhanced for more positive lock-up engagement, great for big-inch/high-horsepower motors
- Except Breakout & Fat Boy

DESCRIPTION	PART #
Belt Drive 2" Open 18-20 ST	<b>1120-0431</b>
Belt Drive 2" Open 18-20 ST Black	<b>1120-0434</b>
